

**How do you accelerate the growth
of your business and reduce costs
at the same time?**

DATAMARK's F&A solutions are helping organizations everywhere streamline their finance processes to improve efficiency, compliance, and risk mitigation while enabling end-to-end process transformation to support business growth...

...and all for a cost that's less than you're paying now.

DATAMARK® | FAS
Finance & Accounting Services

Why outsource your Finance & Accounting processes?

For over 20 years, DATAMARK has been helping companies improve finance and accounting operations by applying Lean Sigma principles to reduce errors, reduce the number of days sales outstanding (DSO) and reduce overall F&A operating costs. No matter the scope or scale, we start where you choose and proceed at the pace you want to ensure you are always moving closer to best-in-class.

Our Process

Receive

Capture

Verify

Deliver

Archive

Receive paper or electronic documents

Capture critical data fields along with special handling requirements

Verify for accuracy

Deliver data in batches or key directly into system

Store original documents in secured location

Our F&A Services

- Invoicing: Receipt, Scanning, Data Entry
- 3-Way Match Processing
- Cash Application
- Receivables Reconciliation
- Remittance Processing
- Travel & Expense Processing
- Proof of Delivery
- Proof of Deposit

Our Approach

- **ADAPT**
We adapt our processes and personnel to leverage our client's existing billing system in order to minimize IT-related expenditures that can delay implementation and increase costs.
- **OPTIMIZE**
We use Lean Sigma principles and technology as necessary to streamline workflow and improve productivity levels that translate to improved service levels for your customers.
- **DELIVER**
We leverage a team of highly qualified and very affordable personnel to process your transactions quickly and accurately resulting in faster "Time-to-Cash" for you.

Our Results

Reduced Expenses

- Consolidating and streamlining processes
- Introducing standardization
- Applying proven technologies
- Leveraging global processing centers

Improved Quality Levels

- Eliminating critical billing errors (DATAMARK guarantees a **99.5% accuracy level** on all data fields entered)
- Automating bill auditing to reduce the sample size and associated costs
- Implementing corrective action programs focused on continual process improvement

Reduced Employee Turnover

Enhanced employee training programs and activity-based compensation help create and retain subject matter expertise and reduce turnover.

Increased Insight & Control

Our secure customer web portal provides an enterprise view of transaction processing, resulting in:

- Real-time viewing of Key Performance Indicators (KPI) that enable clients to quickly assess and adapt their business to meet ever-changing customer demands
- Real-time prioritization of high impact functions
